SEARCH FOR TALLINN/CHEREPOVETS-TYPE DEFENSIVE MISSILE SITES, USSR

This report presents the results of a search within 100 nautical miles (nm) of latitude 60 degrees between Cherepovets, USSR (59-08N 37-55E) and the Ural Mountains (50 nm north and south of latitude 60 degrees) for Tallinn/Cherepovets-Type Defensive Missile Activity. This area is graphically illustrated in Figure 1.

A search of the above area was made from the latest and best photographic coverage. This search revealed no Tallinn/Cherepovets-type missile sites in the prescribed search area. Cloud-free coverage of the entire area was obtained utilizing a collection of photographic missions ranging in date from

This is the fourth of six areas to be searched on the original requirement. The first three (100 nm of the border from Odessa to Rostov to Astrakhan, within 100 nm of Tibilisi and Baku, and within 100 nm of Krasnovodsk to Mary to Tashkent to Alma Ata) were previously searched with negative results. The results of these searches were reported in dated 19 January 1965, and in CIA/PIR-61013, dated 4 August 1965.

Still to be searched on the project are the following areas:

- (a) Within 100 nm of Pikalevo, USSR
- (b) The border area within 100 nm of Tallinn to Riga and Roja to Kaliningrad.

Three additional search areas were added to the original requirement at a later date. These areas, yet to be searched, are within a 50 nm radius of the following locations:

- (a) Petrozavodsk
- (b) Parakhino (Padubyl)
- (c) Kineshma

The locations and present status of all search areas in this requirement are graphically portrayed in Figure 2.
